REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art of record does not disclose or fairly teach a hand tool having a handle mounted to the tool through a vibration damping element, wherein a handle mounting device has fastening members engaging a mount to fix it to the motor housing. wherein each fastening member passes through the unitary component and penetrates a passage in the mounting plate, a passage in the vibration-damping element, and a passage in the mount, wherein all of the passages are aligned with one another, wherein each fastening member engages with one end of the motor housing and has a stop part formed as a collar on its shaft, wherein the stop part engages the mount and firmly clamps the mount against the motor housing. The closest prior art, for example to Radle et al, 5,697,456, discloses fastening members passing through the mounting plate and mount, but not through passages in the vibration damping element.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
